Me:

Thinker:

Who am I paragraph:

Who am I? I'm a college student from Washington. I'm pretty scatterbrained and sometimes it's hard to even remember things I want to do, let alone do them, and at college that issue's only

gotten worse when I don't have other people keeping me accountable. That's where I got the idea for Project Pulse.

Why make project Pulse paragraph:

So why is Project Pulse the solution to issues caused by things like ADHD? Project Pulse allows you to customize what you want to be reminded about, how invasive that reminder is, and how frequent you're reminded about certain things. Whether you just need gentle reminders, or a giant textbox in the middle of your screen, Project Pulse helps YOU keep you accountable. And during those times when you get distracted by Youtube or you forgot you were gonna go grocery shopping this week, Project Pulse will make sure you remember.
